

ABC Technologies Pvt. Ltd.

Fictional Company Knowledge Base — RAG Learning Dataset

1. Company Overview

ABC Technologies Pvt. Ltd. is a fictional software company created specifically for learning and demonstrating Retrieval-Augmented Generation (RAG). The company builds cloud-based business applications for small and medium-sized organizations. Its main office is located in Chennai, India, and it has approximately 180 employees.

2. Products and Services

Product / Service	Description
ABC Analytics	A business intelligence platform for dashboards, reports, KPIs, and scheduled data analysis.
ABC Cloud	A cloud hosting and storage platform used by customers to deploy internal applications.
ABC Support	A customer-support service providing technical assistance, incident tracking, and product guidance.
Data Engineering Services	ETL pipelines, data integration, data-quality checks, and warehouse development.

3. Company Departments

- Engineering:** Develops and maintains ABC's software products. The department includes backend, frontend, mobile, DevOps, and data-engineering teams.
- Data & Analytics:** Builds analytical datasets, dashboards, data pipelines, and reporting solutions. The team uses SQL, Python, and cloud data platforms.
- Customer Success:** Helps customers adopt ABC products, handles product questions, and coordinates escalations with engineering.
- Human Resources:** Manages recruitment, onboarding, leave policies, employee records, training, and internal development programs.

4. Important Company Facts

- Founded: 2019
- Headquarters: Chennai, India
- Employees: Approximately 180
- Primary business: Software and data services
- Working model: Hybrid
- Fiscal year: April to March
- Main customer segment: Small and medium-sized businesses

ABC Technologies — Policies & Operations

5. Employee Policies

Working Hours: ABC follows a flexible hybrid schedule. Core collaboration hours are 10:00 AM to 4:00 PM on working days. Individual teams may define additional meeting windows.

Leave: Employees receive 18 annual paid leave days and 12 sick leave days per financial year. Leave requests are submitted through the internal HR portal.

Remote Work: Employees may work remotely up to three days per week, subject to team requirements. Certain customer-facing activities may require employees to work from the office.

Security: Company laptops must use device encryption, screen locking, and multi-factor authentication. Employees must not share passwords or upload confidential company data to unapproved external services.

6. Customer Support Process

ABC Support classifies customer issues into four priority levels:

Priority	Meaning	Target Initial Response
P1 — Critical	Major outage or severe business impact	30 minutes
P2 — High	Important feature unavailable or significant degradation	2 hours
P3 — Normal	Standard product issue or question	1 business day
P4 — Low	General request, documentation, or minor issue	2 business days

7. Product Information

ABC Analytics: The platform supports dashboard creation, scheduled reports, role-based access, CSV uploads, and SQL-based analysis. Standard dashboards refresh every six hours unless a customer has purchased a custom refresh schedule.

ABC Cloud: Provides application hosting, object storage, backups, and monitoring. Customer data is logically isolated between customer accounts.

ABC Support: Customers can open tickets through the support portal. Every ticket receives a unique ticket number and is assigned to a support queue.

8. Internal Contact Rules

Employees should use the internal service desk for IT problems, the HR portal for employee-related requests, and the customer-support system for customer incidents. Urgent security incidents should be reported immediately to the Security Operations team.

ABC Technologies — RAG Reference Information

9. Example Questions for a RAG System

The following questions can be used to test whether a RAG application retrieves the correct information from this document before generating an answer.

Question	Expected Information
Where is ABC Technologies headquartered?	Chennai, India.
How many annual paid leave days are provided?	18 annual paid leave days.
What are the core collaboration hours?	10:00 AM to 4:00 PM on working days.
How often do standard ABC Analytics dashboards refresh?	Every six hours.
What is the P1 support response target?	30 minutes.
How many remote-work days are generally allowed?	Up to three days per week, subject to team requirements.
Which team handles employee leave requests?	Human Resources, through the HR portal.

10. Suggested RAG Experiment

Use this PDF as the source document for a simple RAG pipeline. First, extract the text from the PDF. Next, split the text into smaller chunks and create an embedding for each chunk. Store the embeddings in a vector database or an in-memory vector index. When a user asks a question, embed the question, retrieve the most similar chunks, and provide those chunks to a language model as context.

Example retrieval flow

User question → Query embedding → Similarity search → Relevant chunks → LLM with retrieved context → Final answer

11. Questions That Test Retrieval

Try questions that require information from different sections, such as: "What is the response target for a high-priority customer issue?"; "Can an employee work remotely three days per week, and what are the core collaboration hours?"; "Which product provides dashboards and how frequently are its standard dashboards refreshed?" These questions help demonstrate why retrieval is useful when the answer is distributed across a document.

12. Note for Learning

This company, policies, numbers, products, and operational details are entirely fictional. The document is intended only as a controlled knowledge base for experimenting with PDF parsing, chunking, embeddings, vector search, retrieval, and answer generation in a RAG application.
